

DAVE REST API Design

Version: FINAL_v2 | Status: ??? | Last modified: see git

Contact & Ownership

Tech Lead	john.smith@omniaccess-internal.com	+1 415 555 0192
Backend Dev	anna.mueller@omniaccess-internal.com	
DevOps	pedro.ruiz@omniaccess-internal.com	+34 600 123 456

Endpoints

Method	Path	Auth	Description
POST	/api/v1/documents/upload	JWT	Upload document for validation
GET	/api/v1/runs/{id}	JWT	Get validation run status
GET	/api/v1/runs/{id}/findings	JWT	List findings for a run
PATCH	/api/v1/findings/{id}	JWT	Update finding status
POST	/api/v1/runs/{id}/fix	JWT	Trigger ReAct fix

Authentication

All endpoints require a Bearer JWT token in the Authorization header. Tokens are issued by POST /api/v1/auth/login and expire after 24 hours.
